Guillow's: Because Simple Fun is Sometimes the Best Fun (with airplane/glider giveaway)!

Sometimes the best fun, is the simple fun. So when a box arrived at our house, full of [Guillow's](#) foam gliders and wood-balsa airplanes, I told little man to go ahead and open it. He had no idea what was inside, so he was pretty geeked when he got to the contents...and he wanted to go to the park. I'd anticipated that and already had my car keys in hand. ;)

[Guillow's](#) Foam Gliders and Wood-Balsa Airplanes start at an amazing \$1.79

We started with the Eagle Balsa-Wood Airplane, [\\$1.79](#)

Good old fashioned fun is *never out of style*.

The selection of planes we were sent were for ages 8 and up (because there are small parts). My son is 6, but I was right there next to him for supervision.

We started with The Eagle Balsa-Wood Airplane, easily assembled right there at the park in about a minute (yep, a minute).

Little man went on the monkey bar stairs to gain some leverage, but you know that's not overly steady, so he came down and tried the balance stairs instead. ;)

Look at 'er go!

Flying his Delta Dart Foam Glider ([\\$3.99](#) for a 2-pk)

That smile is priceless. Our son thought these planes were the definition of fun.

That was a big success, look at 'er go!

We flew that around for a little while and moved on to the Delta Dart foam gliders. They come in a 2-pk. and they have a 4" wing span. These little beauties are fun to fly and they require no assembly at all (though they do come with decorative stickers).

After a few times of Fly & Chase off of the slide (and a lot of laughing from the boy), we went back to the box to see what else there was to test fly.

The Sky Raider Plane, [\\$6.99](#)  
This can be thrown high for loops and floating glides.

Assembly was as easy as you see here.  
Just push pieces into place, decorate with stickers, and it's time to fly.

That's when we opted to break out the Big Daddy of 'em all, The Sky Raider Plane. This is a large 24" wing span (foam) plane that can be thrown by a baseball arm for loops and long glides. My husband is Mr. Baseball and can throw from right field to home plate in seconds without batting an eye...guess who we want coming along with us next time we go to the park to play? I can't wait to see what the plane will do with his added oomph.

We had a good enough time with it on our own though, as you can clearly see in the pics. My son ~~liked~~ loved that it was big.

The Sky Raider Plane is as big as my son's whole upper body. Luckily, it's made of lightweight foam and he can carry it easily with one hand. ;)

Guillow's Sky Raider Foam Plane (in flight)

I ~~liked~~ loved that it made him happy. And boy, could it fly!! A very successful, fun day at the park. Our first park day of the year, as a matter of fact. Thank you, Guillow's. :)

You can learn more about Guillow's wide range of build-it-yourself kits by visiting their [website](#). They also are sold at popular online outlets such as Amazon.
